SAI CHAITANYA MOTOR

Senior Business Analyst | 7+ Years | Financial Services · Banking · ERP · eCommerce. Web & Mobile Applications

saichaitanyamotor@gmail.com | 732 385 3693 | Sterling, VA

PROFESSIONAL SUMMARY

Data-grounded Senior Business Analyst with 7+ years of end-to-end delivery experience across regulated financial services, wealth management, core banking, and ERP environments. Specializes in governing full CR lifecycles through CAB/CCB frameworks, establishing real-time data quality monitoring pipelines, and compressing multi-day reporting cycles to same-day automated delivery. Operates as the accountability layer between compliance, offshore development, C-suite stakeholders, and regulatory mandates — from sprint inception through post-release production monitoring. SAFe 6.0 Agilist with deep fluency in **SOX, FINRA, BSA/AML, OCC**, ERP implementation (Acumatica, Oracle), cloud data platforms (Azure, AWS, Snowflake), and full-lifecycle Agile delivery across cross-functional, offshore/onshore environments.

CORE EXPERTISE & TECHNICAL SKILLS

ERP Platforms	Acumatica ERP (GL, AP/AR, Inventory, Order Management, Financial Posting) · Oracle ERP (awareness) · Microsoft Dynamics 365 (awareness) · Salesforce CRM · Full ERP Implementation Lifecycle
eCommerce & OMS	Shopify Plus · BigCommerce · Adobe Commerce · ERP/OMS Integration · Bidirectional Product/Inventory/Order Sync · Order-to-Cash Automation · Multi-Warehouse Management · Channel-Specific Pricing
Banking & Finance	AML/KYC · Fraud Detection Rules · SOX Internal Controls · KYC Onboarding Workflows · Financial Reconciliation · Regulatory Reporting · GL/AP/AR · Budgeting · Core Banking Systems
Data & Analytics	SQL (complex queries, data validation, stored procedures) · Python (Pandas, scripting) · Power BI (DAX/Power Query) · Tableau · Splunk (SPL) · Azure Synapse · Snowflake · AWS Redshift · ETL Design
Web and Mobile Applications	Mobile App Lifecycle · API-First Requirements · REST & GraphQL API Specs · SDK & Third-Party Integration · App Store Release Cycles · Push Notifications & Deep Linking · Mobile UAT · Crash Analytics (Firebase · Crashlytics) · Feature Flagging · A/B Testing · App Performance Monitoring
Cloud & Integration	Azure (Data Factory, Synapse, Databricks, Purview, ADLS) · AWS (S3, Glue, Redshift) · REST API Specs · Postman · Data Migration Design · System Integration Specifications
BA Deliverables	BRD · FRD · FSD · User Stories + Acceptance Criteria · Data Mapping Matrix · RTM · Process Flow Diagrams (Visio/Lucidchart) · Gap Analysis · UAT Test Plans · API Specs · RACI Matrix
SDLC & Agile	Full SDLC (Initiation → Planning → Build → Test → Release → Close) · Agile Scrum · SAFe 6.0 · Sprint Planning · Backlog Refinement · JAD/JAR Sessions · UAT Governance · CAB · CCB · OCM · Retrospectives
Tools	Jira · Confluence · Azure DevOps · Zephyr Scale · TestRail · MS Project · Smartsheet · Miro · Figma · SharePoint · Postman · Lucidchart · MS Visio · MS Teams · AUTOSYS

PROFESSIONAL EXPERIENCE

Affinity Bank | Business Analyst

Nov 2023 – Present
Atlanta, GA

- **Established a cross-functional stakeholder communication plan at project initiation** — mapped a 15+ stakeholder matrix spanning business owners, IT architects, compliance officers, QA leads, and C-suite sponsors; defined weekly interdepartmental alignment sessions and monthly steering committee reviews; maintained a live RACI matrix and escalation framework keeping all decision-making accountable and sprint-aligned throughout every upgrade lifecycle.
- **Spearheaded regulatory-compliant data lifecycle across core banking systems** — defined transformation rules, storage schemas, and governance standards for pipelines processing 30,000+ daily transactional records, ensuring BSA/AML and OCC audit readiness across 3 major system upgrade cycles delivered within 90% of allocated budget hours.
- **Authored BRDs, functional specifications, UAT script**s with acceptance criteria, and release runbooks for each banking system upgrade — translated regulatory mandates into sprint-ready technical requirements and eliminated requirement ambiguity that had previously caused 2-week delays in prior upgrade cycles.
- **Managed full Change Request lifecycle across 3 major banking system upgrades** — conducted change impact assessments across regulatory, operational, and technical dimensions; facilitated Change Advisory Board (CAB) review sessions with compliance and IT leadership; maintained a CR traceability matrix ensuring zero unauthorized changes reached production across any release cycle.
- **Drove Organizational Change Management (OCM) across all system upgrade deployments** — developed stakeholder communication plans, readiness checklists, and adoption workshops for 50+ business and operations staff; achieved full user readiness sign-off before each go-live with zero post-deployment operational disruption.
- **Led all Scrum ceremonies** — daily standups, sprint planning, backlog grooming, sprint reviews, and retrospectives — across cross-functional teams spanning business, IT, compliance, and QA; maintained real-time sprint progress visibility through Jira dashboards presented to senior management weekly.
- **Applied FMEA and Pareto risk analysis** during pre-sprint planning across all 3 upgrade cycles — redistributed workload across senior and junior technical resources based on complexity scoring, preventing scope overruns estimated at 200+ engineering hours across the full upgrade program.
- **Monitored post-release production** health using Splunk dashboards and AUTOSYS job scheduling logs — tracked 15+ automated batch jobs nightly, surfaced SLA breach signals an average of 4 hours before escalation to incident status, and maintained 95% SLA adherence across all high-priority banking workflows in live production.
- **Built parameterized Power BI dashboards and automated Excel reporting pipelines** serving 10+ C-suite and compliance stakeholders — compressed a 3-day manual reporting cycle to same-day delivery and implemented RPA-assisted workflow automation saving 400+ manual processing hours annually, formally presented to operations leadership as a strategic efficiency initiative.

Broadridge Financial Solutions |
Business /Wealth Management Analyst

Jan 2021 – Sep 2023
Hyderabad, India

- **Established real-time data quality monitoring frameworks and exception-handling pipelines** across 5+ wealth management reporting modules — identified and resolved critical dataset discrepancies mid-sprint before any erroneous output reached dashboards serving 20+ US institutional accounts, maintaining 95%+ accuracy in client-facing portfolio analysis throughout the full 2.5-year engagement.
- **Designed and maintained a structured stakeholder communication framework** across a 20+ stakeholder matrix spanning US clients, offshore development leads, QA teams, compliance officers, and executive sponsors — established bi-weekly steering committee presentations and a defined escalation matrix ensuring no critical issue remained unresolved beyond 24 hours.
- **Owned full-lifecycle Agile delivery of wealth management platforms across a 2.5-year engagement** — managed epics, user stories, sprint commitments, and release gates mapped to FINRA and capital markets compliance standards; coordinated offshore development and QA teams across 3 time zones via Jira and Confluence; sustained 95% on-time delivery with zero compliance escalations.
- **Conducted JAD sessions and discovery workshops with US client stakeholders to lock requirements** before sprint commitment — authored BRDs, functional specifications, and end-to-end workflow diagrams for 5+ finance modules; enforced Change Control Board (CCB) approval protocols; eliminated mid-sprint scope changes entirely across the last 4 major releases.
- **Governed end-to-end Change Request lifecycle across 5+ platform release**s — facilitated Change Advisory Board (CAB) review sessions; prioritized CR backlog against sprint velocity; maintained SOX audit-ready traceability from regulatory trigger to deployed solution at every sprint checkpoint.
- **Facilitated all Scrum ceremonies across offshore and onshore teams operating across 3 time zones** — ran daily standups, sprint planning, backlog grooming, sprint reviews, and retrospectives; implemented retrospective outputs that reduced average sprint carry-over by 40% over the engagement lifecycle.
- **Applied FMEA-based risk assessment and Pareto-driven task distribution** — cut average rework cycles from 3 rounds to 1 and compressed delivery timelines by 1.5 sprint cycles per major release, protecting client SLAs across every phase gate.
- **Led stress testing and query optimization on financial datasets exceeding** 2M+ records — profiled Power BI execution plans, restructured underlying data models and DAX measures, and reduced dashboard load times from 45 seconds to under 9 seconds, directly driving adoption among 200+ wealth managers.
- **Engineered Power BI dashboards** using DAX measures, row-level security across 4 user permission tiers, and scheduled refresh pipelines — compressed a 5-day manual reporting cycle to same-day automated delivery for 15 portfolio managers, removing 2 dedicated analyst hours consumed daily.

- **Led executive steering committee presentations and sprint demo sessions** — translated technical delivery outcomes and CR status into business impact narratives for senior leadership and US client stakeholders; maintained zero client escalations across the full 2.5-year engagement.

Air India SATS | Data Analyst → Business Analyst

Jun 2018 – Jan 2021
Hyderabad, India

- **Onboarded as Data Analyst collecting and validating 50,000+ daily transactional records across ERP**, Excel, and REST API sources — promoted to Business Analyst within 7 months based on demonstrated cross-functional impact, assuming end-to-end ownership of ERP delivery across inventory and finance modules serving 500+ operational staff.
- **Established a structured stakeholder communication plan and escalation matrix at project initiation** — conducted bi-weekly status review meetings with department heads, maintained a live RACI matrix eliminating role ambiguity, and ensured every decision had a clearly accountable owner throughout the full ERP delivery lifecycle.
- **Authored BRDs, FRDs, process workflow diagrams, and UAT scripts with acceptance criteria** mapped to 100+ user stories across 3 sprint releases — facilitated interdepartmental requirement walkthroughs and enforced change control protocols at every sprint gate, achieving full requirement traceability with zero scope deviation.
- **Managed end-to-end Change Request lifecycle across all ERP module deliveries** — documented, assessed business and technical impact, obtained stakeholder approval through structured CCB review sessions, and tracked CR closure ensuring zero unauthorized changes reached production.
- **Led all Scrum ceremonies** — daily standups, sprint planning, backlog grooming, sprint reviews, and retrospectives — with cross-functional teams spanning operations, backend development, and QA; surfaced blockers to senior management within the same business day they were identified.
- **Partnered with backend developers to define ETL transformation rules**, resolve pipeline bottlenecks, and drive workflow automation — eliminating 120+ manual processing hours per project phase and compressing a 4-day data reconciliation cycle to same-day resolution across all ERP modules.
- **Designed and executed structured UAT sessions across 3 ERP release cycles** — managed end-to-end defect lifecycle from logging through regression to sign-off; cleared all modules for production deployment with zero critical defects escalated across any release.
- **Built Splunk monitoring dashboards and anomaly detection scripts for post-release ERP surveillance** — tracked live transaction processing across 50,000+ daily records, surfaced irregularities before SLA breach, and reduced delayed transaction errors by 15% within the first 30 days of go-live.
- **Developed OCM documentation including training manuals, SOPs, and onboarding guide**s — reduced new operations staff onboarding time by 20% and ensured zero regression in operational output quality during staff transitions across the full 3-year engagement.

FLAGSHIP PROJECTS

Wealth Management Data Modernization & Reporting Platform | Budget: $2.4M

Power BI · Azure Data Factory · SQL Server · REST APIs · Jira · Confluence | SDLC | SOX · FINRA Compliance

Role: Lead Business Analyst

Led end-to-end BA delivery of a wealth management data modernization initiative serving 20+ US institutional accounts. Governed the full CR lifecycle through CAB and CCB frameworks, facilitated JAD sessions with executive client stakeholders, authored BRDs and traceability matrices for 5+ finance modules, and coordinated offshore development and QA teams across 3 time zones. Drove FMEA-based risk analysis during pre-sprint planning and managed stakeholder communication across a 20+ member steering committee.

Outcome: Reduced Power BI dashboard load from 45s to under 9s · Compressed 5-day reporting cycle to same-day delivery for 200+ wealth managers · 95% on-time delivery across all sprint phases with zero compliance escalations · Rework cycles cut from 3 rounds to 1 per major release.

Core Banking System Transformation & Regulatory Compliance Upgrade | Budget: $1.8M

AUTOSYS · Splunk · Power BI · ServiceNow · Jira · RPA | SAFe Agile · OCM · Change Management

Role: Business Analyst & Change Management Lead

Spearheaded 3 concurrent core banking system upgrades as the central accountability bridge between business, IT, compliance, and QA stakeholders. Applied FMEA and Pareto risk analysis to pre-sprint planning, managed full CAB review and CR traceability across all upgrade cycles, drove OCM adoption workshops for 50+ operational staff, and established Splunk and AUTOSYS post-release monitoring infrastructure for 15+ nightly batch jobs.

Outcome: 3 major upgrades delivered within 90% of budget hours · Zero unauthorized changes reached production · 95% SLA adherence maintained in live production · 400+ manual processing hours eliminated annually · $25K+ annual operational savings formally presented to leadership.

CERTIFICATIONS

■ **SAFe 6.0 Agilist** — Scaled Agile Inc. ■ **Business Analysis & Process Management** ■ **Advanced Business Analysis** — BA Centric · 2021 ■ **Certified Associate in Engineering Management (ASEM)** ■ **Agile with Atlassian Jira** — Atlassian ■ Generative **AI** — Google Cloud ■ **Project Management** — Google / Coursera ■ UI**/UX Design Certification** ■ **PMP** in Progress

EDUCATION

Master of Science — Project Management

Harrisburg University of Science and Technology, Harrisburg, PA

Oct 2023 – May 2025

GPA: 3.87 / 4.0

Bachelor of Technology — Aeronautical Engineering

Malla Reddy College of Engineering and Technology, Hyderabad, India

Sep 2014 – Apr 2018
